

PRODUCT SUMMARY SHEET

GAUTENG PROVINCIAL LAND COVER (10 m):

The *Gauteng Provincial Land Cover (10 m)* data set is mapped at a landscape-level and is either provided as a raster land cover data set or as a vector data set with the primary, secondary and tertiary land cover identified and reported as a percentage of the EA polygon.

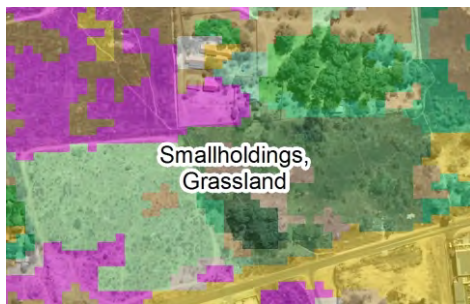

This landscape-level land cover emphasises the natural features in the landscape as opposed to the man-made built environment.

Land Cover Data

CORE QUESTIONS:

- What land cover classes occur in Gauteng?
- What is the primary, secondary and/or tertiary land cover class per EA?
- What percentage of an EA is covered by the primary, secondary and/or tertiary land cover class?
