

DATA PRODUCT SHEET

MOZAMBIQUE NATIONAL BASELINE LAND COVER

The GEOTERRAIMAGE, 2013-14 Mozambique National Baseline land-cover © dataset, has been generated from multi-seasonal, 30 metre resolution Landsat 8 satellite imagery, captured between April 2013 and June 2014. The land-cover dataset provides seamless data coverage for the whole country. A hill-shaded version is also available for backdrop applications and functions.

The 7 x class land-cover product represents a foundation level land cover, with additional levels of classification to be released subsequently.

CORE QUESTIONS

- How will a national development corridor impact the vegetation cover across the country?
- What percentage of Mozambique is covered in trees?
- What extent of the country has been commercially cultivated?

Coverage: Mozambique
Formats: Raster files: 30 m cells (Erdas img)
Attributes: 7 classes: Water, Bare, Low Vegetation & grassland, Tree / Bush dominated, Tree Dominated, Cultivated, Sports & Golf courses
Latest release: 2014
